

Akash Patial – Implementation Engineer

📞: +91-7018194492 | ✉: akashpatial85@gmail.com | 📍 Punjab, INDIA |  [LinkedIn](#)

With over 4+ years of experience, works in application deployment, production readiness, and system reliability across on-premises environments, including infrastructure hosted on OpenStack. Delivered 5+ production sites for Vodafone-Idea, providing 24x7 go-live support and coordinating with teams to ensure stable releases, monitoring, and smooth handover to operations.

KEY SKILLS

Application Deployment | Production Readiness | Troubleshooting | Infrastructure Coordination | Root Cause Analysis | Security Compliance | Monitoring & Alerting | System Reliability | High Availability | Incident Management | Automation

TOOLS & TECHNOLOGIES

Operating System: Linux (RHEL) | **Scripting Languages:** Shell, Python | **Database:** MySQL | **Container & Orchestration:** Docker & Kubernetes | **Version Control:** Git, GitHub | **Platform:** AWS | **Infrastructure as Code:** Terraform

PROFESSIONAL EXPERIENCE

Implementation Engineer Pert Telecom Solutions Private Ltd.	Chandigarh, IN Sep 2024 – Present
Executive Smart Ping AI Private Ltd.	Punjab, IN Sep 2021- Aug 2024

Application Deployment – Vodafone-Idea

- Led end-to-end application deployment lifecycle from provisioning to production go-live in on-premises environments, providing **24x7 on-call support** to ensure successful releases.
- Coordinated with infrastructure teams for VM, network, and storage provisioning, and troubleshoot cross-layer issues during deployments.
- Deployed and configuration application stacks, including network setup, node integration with VI SNOC teams, and implemented SNMP-based monitoring and alerting.
- Performed end-to-end validation, including redundancy and failover testing, along with Vulnerability Assessment and OS-level security scans to ensure reliability and compliance.
- Prepared HOTO documentation and executed seamless handover of production systems to operations teams, ensuring stability post go live.

Technical Support Engineer - SMS/SMPP

- Managing **24x7** incident response and service requests for A2P/SMPP connections and SMS gateway servers, ensuring **99.9% uptime** and meeting strict SLA requirements.
- Performed root cause analysis on delivery failures and services degradation using log analysis and identifying recurring error patterns.
- Supported UAT (User Acceptance Testing) for change requests, facilitating smooth production rollouts with zero critical incidents.
- Maintained compliance with regulatory requirements through spam filtering, blacklist/whitelist management.
- Performed packet-level analysis using TCP Dump to capture SMPP traffic, enabling root cause identification and proactive issue resolution.

KEY PROJECTS EXECUTED

Project: Order Processing System | **Duration:** March 2026 – **Present**

Key Achievement:

- Reduced deployment time by 60-80% using Jenkins and Argo CD- based Git Ops workflows.
- Ensured consistent infrastructure provisioning using Terraform.

EDUCATION

- **B.E – Computer Science Engineering** | Chandigarh University| 2021| 6.43 GPA
